

Information Processing Board Survey

Plug-to-Plug Substitution of Disk and Tape Drives

Refer to ADP MIS Inventory printout furnished by O/PPB in January 1970:

List each rented IBM 2311, 2314, 729 and 2401 device.

Information for col. (1) through (4), below, is to be selected from your copy of the ADP MIS printout.

You are to indicate your response in col. (5) using the following code (furnished by GSA).

1. Substitution action should be initiated.
2. Substitution plans already under way.
3. Item will be released in near future.
4. Character of computer installation precludes multi-vendor support.
5. Physical or security matters involve complex maintenance problems.
6. Other (explain).
